

J3[®] FORM BACK SUPPORT

For those individuals who require a more complex seating solution, the JAY[®] J3 Form Back Support can be used when an off-the-shelf back cannot accommodate an individual's orthopedic asymmetries. Featuring the J3 Back that you know and love, this mix-and-pour contouring system makes it easy to create a personalized solution to suit your client's specific needs.

SUPERIOR CLINICAL SEATING

J3[®] FORM BACK SUPPORT

Benefits of a J3 Form Back Support

- Provides proper body positioning personalized to the client's unique skeletal structure
- Utilizes JAY J3 shell, cover, and hardware
 - 3DX Microclimatic outer cover dissipates heat and moisture, increasing comfort and sitting tolerance
 - The zipper is conveniently located at the top of the back support for easier access during the mold-in-place process
- Coded as an E2617
 - Covered when a prefabricated seating system is not sufficient to meet seating and positioning needs

Fast and easy to create

- Mix the foam-in-place and pour into the molding bag within the J3 back cover secured on the client's chair
- The client leans into the bag and the foam will mold to the client's optimal seating position
- Available in three foam densities: extra soft, soft and medium
