Bag for oxygen bottle

Bag with lid and shoulder strap

Safety, support and stability

The unique and very stable design ensures that you can walk securely in all settings. When you need a rest, Gemino has a comfortable and convenient seat with back strap.

Comfortable, correct position for walking

It is easy to adjust Gemino to the correct height. The brake and pushing handles have been carefully designed to be comfortable and easy to use. A memory feature ensures handle heights can always return to the proper setting.

Safe and easy to use

High-quality integrated reflectors make Gemino clearly visible to road users. The unique brake block design ensures that the brakes stop the wheels very effectively. The design of the built-in curb climber makes it very easy to negotiate obstacles such as curbs and door sills. A unique side deflector makes it easier to navigate doorways, table legs and other furniture, without the risk of the back wheels getting caught.

Gemino – design

The items with which we surround ourselves help define how we are perceived. The elegant and sleek design of Gemino appeals to both young and old alike.
